Seed Library

It displays about 500 species of seeds and various exhibitions, including seed miniature drawings, photographs, and specimens. A program where people borrow seeds, grow, and return them is also available.

10:00 AM – 5:00 PM
(Closed on Mondays)

Plant Library

We have a collection of 9,000 specialized books related to plants, ecology, gardens, and landscaping. With various materials we collect and retain, visitors can freely use information about plants and horticulture.

9:30 AM – 6:00 PM
(Closed on Mondays and holidays)

Garden Research Center

To share and promote the culture of gardening, we provide a variety of customized services, such as offering specialized consultation services (Plant Clinic and consultation on companion plants), exhibiting model gardens, and introducing the latest information on gardens.

10:00AM – 5:00PM (Closed on Mondays)

Amenities

You can enjoy a variety of drinks and desserts at cafes (1F & 4F) and visit the Korean Traditional Restaurant and food court on the fourth floor. There is also a convenience store to buy drinks, snacks, and daily necessities.

9:30 AM–6 PM (Closed on Mondays)

Seoul Botanic Park GREENHOUSE

It is the world's only greenhouse in a shape of a concave plate. More than 1,000 species of plants from 12 cities located in the tropics and the Mediterranean Sea are exhibited in this hall with an area of 7,602 m², a circle with a diameter of 100 m, and a height of up to 25 m. Visitors can experience the unique plants and horticulture of each climatic zone. There is an 8-meter-high skywalk in the Tropics where visitors can observe the leaves and fruits of tall tropical plants up close.

Tropics(plants from 4 countries)

The hall exhibits pants from four cities with the tropical climate. It recreates the lush landscape of tropical forests with hot, humid conditions.

- 1

Etlingera elatior
- 2

Ficus religiosa
- 3

Mangifera indica
- 4

Cocos nucifera
- 5

Socratea exorrhiza
- 6

Victoria amazonica
- 7

Musa acuminata 'Dwarf Cavendish'
- 8

Calathea lutea

Mediterranean Sea(plants from 8 countries)

The hall recreates eight cities with the mild Mediterranean climate. You can enjoy warm sunshine and representative plants such as olive trees and herbs that remind you of the Mediterranean region.

- 9

Dracaena draco
- 10

Agave americana
- 11

Olea europaea
- 12

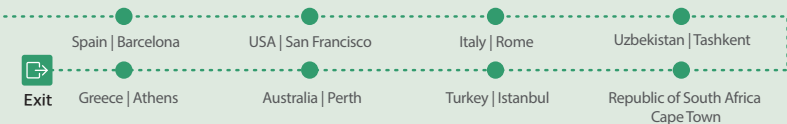

Cupressus sempervirens
- 13

Phoenix dactylifera
- 14

Adansonia digitata
- 15

Lithops sp.
- 16

Brachychiton rupestris

How to Use Greenhouse Audio Guide
(available in Korean, English and Chinese)

Embark on the journey with Bao Bao, an alien living in the greenhouse!
You can rent an audio guide and listen to the plant commentary by pressing the number in the headset in front of the plant. You can also download the Guide On application (scan the QR code).

Reminder
When Inside the
Greenhouse

Do not enter planted areas.

Wheeled shoes or kick scooters are not allowed.

Do not step on, damage, or collect the exhibited plants.

No food or drink except water is allowed in the greenhouse.

Tripods are not allowed when taking photos or videos.

SEOUL BOTANIC PARK GUIDE MAP

GUIDE MAP

SEOUL BOTANIC

As the first urban botanic garden in Seoul, Seoul Botanic Park cultivates wise future citizens who are aware of the importance of horticulture and a variety of plant species. It organically integrates a botanic garden and a public park. It is continuously growing with the goals of proposing a future for Seoul as a sustainable green city and possessing at least 8,000 species of plants through proliferation and exchanges with domestic and international organizations.

1

Botanic Garden

Botanic Garden consists of outdoor Display Gardens reproducing the Korean traditional garden with native plants, and Greenhouse (Botanic Center) exhibiting plants from tropical and Mediterranean cities. Other attractions include the Kid's Garden School and Magok Cultural Hall (previous pump station) designated as the cultural heritage.

Display Gardens

You can experience the most colorful seasons in Seoul Botanic Park with gardens of eight different themes.

Botanic Center (Greenhouse)

In addition to the greenhouse which exhibits plants from 12 cities around the world, the center operates educational and cultural spaces for various events and exhibitions such as Permanent Exhibition Hall, Project Hall, Garden Research Center, and convenience facilities like a souvenir shop, cafes, and restaurants.

Plant Science Lab

Plant Science Lab collects and cultivates target species that need protection, and conducts research in various fields such as conservation of plant genetic resources and development of useful plant resources for enhancing biodiversity.

Kid's Garden School

Kid's Garden School offers educational programs for children related to plants and gardening. Children can experience diverse programs at the vegetable garden.

Magok Cultural Hall

Magok Cultural Hall is a modern cultural heritage located in Seoul Botanic Park that exhibits the agricultural history and data of the Magok region. (Formerly Yangcheon Drainage Pump Station, Registered Cultural Heritage No. 363)

2

Forest Field

At the entrance of Seoul Botanic Park, the help desk welcomes visitors to provide information services. As you enter the plaza connected to the subway station, you can see an enormous Grass Field in the middle of Dulle Forest. Various events, festivals, and special exhibitions are held throughout the season.

Grass Field

Relax and enjoy leisure under the shade of trees surrounding the Grass Field.

Visitor Center

Visitor Center provides visitors with information on Seoul Botanic Park and various events.

Forest Learning School

Forest Learning School is a gardening learning space for adults, offering hands-on garden design and practical training programs.

3

Lake Garden

Lake Garden is a place to learn how ecosystem works by following a wooden pathway that crosses the lake and observing aquatic plants. Take a seat on one of the steps facing the lake and take in the expansive view of the Seoul Botanic Park.

Waterside Trail

The walkway surrounding the lake where you can enjoy the view of the greenhouse and the Park at a glance.

Iris Center

Along the wooden deck, you can enjoy a variety of irises that inhibit along the waterside such as Japanese water irises and Louisiana irises.

4

Wetland

As the area where the Park meets the Hangang River, you can observe the wonderful ecological landscape created by water. Ecological succession creates significant biodiversity. The Park is accessible from the Hangang Interchange and Observation Deck.

Hangang Footbridge

This footbridge crosses Olympic-daero and reaches the Hangang River. From the deck, you can observe the birds that visit or inhabit the Hangang River.
